(54) Title: FOOD PACKAGE AND METHOD FOR HEATING A FOOD PACKAGE

(57) Abstract: The invention relates to a package (1) for containing a plurality of products for heating, comprising: a container (2), manufactured from a material for once-only use, provided with at least two compartments (4, 5, 6) shielded from the environment, and at least one passage opening (8) arranged in the package for a medium for reducing an overpressure in the package, wherein the pressure in the compartments can be maintained at different levels. The invention further relates to a method for heating a plurality of products for heating placed in a single container to different temperatures using a heating source.
